### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest an inverter bypass safety switch including one or more sections joined together to form a contact block having a central axis with a rotatable shaft disposed along the central axis such that a handle on one end of the shaft is turnable to rotate the shaft to thereby operate a cam mounted on the shaft within each section for the operation of a radially sliding movable contact operably connected to the cam via a spring loaded follower which biases the movable contact into engagement with the stationary contact mounted within each section when a low profile section of the cam faces the follower such that the cam rotates to cause the movable contact to move into and out of contact with the stationary contact thereby causing electrical power to be directed either through or around the inverter drive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance." Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Friedhofer whose telephone number is 571-272-1992. The examiner can normally be reached on Mon-Fri 6:00 - 2:30.
